

# Autosound

*mobile solutions*

**Autosound** was established in 1964 and our main business activities are the distribution of audio/video equipment to the bus, coach, rail and leisure (caravan and motorhome) markets.

We also distribute rear view reversing systems, back alarms, digital video recording equipment, mobile wi-fi internet access solutions and we also service and repair car audio systems for Toyota, Lexus and Honda vehicles.

We have comprehensive workshop facilities enabling all types of vehicles from minibuses to double-deck coaches to be handled.

We have a team of highly specialised engineers who are available for installation work either on our or your premises. All our engineers are either fully qualified auto electricians or fully qualified electronic servicing engineers. Clients are guaranteed a high level of service from Autosound whether the requirements are for a simple public address system or a multi channel seat headphone system.

We also offer a mail order service for any purchases and we can accept most major debit/credit cards over the telephone.

4 Lister Street, Dudley Hill, Bradford, West Yorkshire BD4 9PQ, United Kingdom
